

A MODERN RESISTANCE SCHOOL

In the tradition of Poland's underground Flying Universities that defied authoritarian regimes, we're building a refuge for truth.

Today, lessons are being whitewashed, books are being banned, teachers and academics are being targeted, and facts are being labeled dangerous.

We refuse to accept that as the new normal.

WHAT WE'RE DOING:

- Creating free digital lessons on topics that are being censored and stories that are being silenced
- Helping students of all ages turn what they've learned into action
- Connecting students to local community events and organizations that are making a difference
- Providing a platform for educators to share how they're weathering the storm and avoiding political minefields
- Partnering with other organizations to host community learning events

VOLUNTEERS WE NEED:

- Educators and librarians
- Community organizers and activists
- Writers, researchers, and artists
- Storytellers and content creators
- Subject matter experts
- Professionals looking to help behind the scenes
- Anyone passionate about sharing knowledge and defending truth

Note: You are welcome to participate anonymously. We commit to protecting your privacy.
